

Rathod Adesh Siddhartha

Karlskrona, Sweden
adrt25@student.bth.se | +46 0793256688 | LinkedIn

Profile

Master's student in Software Engineering at Blekinge Institute of Technology with knowledge in Python, PostgreSQL, and React, along with project experience in automation and AI-based systems. Interested in software development, system design, software architecture concepts, and intelligent technologies. Comfortable working on practical engineering problems with a structured and responsible approach, both independently and in teams.

Education

Blekinge Institute of Technology	Karlskrona, Sweden
Master of Science in Software Engineering	Expected June 2027

Jawaharlal Nehru Technological University	Hyderabad, India
Bachelor of Technology in Computer Science and Engineering	Graduated 2025

Technical Skills

Programming Languages & Technologies: Python, PostgreSQL, React

Core Areas: Software Development, System Design, Software Architecture Concepts, Frontend Development, Data Handling, Problem Solving, Basic Database Design

AI & Frameworks: AI-based application development, real-time input analysis, basic machine learning project work, LangChain, LangGraph

DevOps Knowledge: Basic theoretical understanding of DevOps, CI/CD concepts, and deployment workflows

Projects

Automatic Exam Seating Arrangement System

- Developed a software solution to automate exam seating allocation in a structured and efficient way.
- Reduced manual effort by organizing seating based on defined logic and constraints.
- Strengthened skills in programming, problem solving, and practical system design.

Real-Time Emotion Detection in Online Classes

- Built an AI-based system to detect emotions during live online classes.
- Worked with real-time input processing and applied AI concepts to generate meaningful outputs.
- Gained hands-on experience in intelligent systems, application logic, and real-time analysis.

Additional Information

Currently based in Sweden and open to internship opportunities in software engineering, AI-focused development, frontend development, data analytics, and technology-focused teams.
